

**BizSMART**

HERE IN OUR COMMUNITY, WE

# COMPOST our food scraps.

Composting is a wonderful way to reduce waste. Instead of going to a landfill, the food scraps and food and beverage-soiled paper products will be turned into a rich soil product used to help new plants grow.

Use this pail to collect your leftovers and food scraps. Empty the contents into the green Compost Cart/Bin.

*You can use BPI-approved compostable bags to line your pail or collect your food scraps in. For a list of bags that you can use, visit [www.bpiworld.org/BPI-Public/Approved/1.html](http://www.bpiworld.org/BPI-Public/Approved/1.html)*

For tips on how to prevent mess and odors, visit [www.recologysanmateocounty.com/composting\\_tips.php](http://www.recologysanmateocounty.com/composting_tips.php)

*You can take your plastic bags to the grocery store for recycling.*

**These items  
CANNOT  
go in your  
Compost.\***

*\*Place plastic containers #1-7, glass bottles & jars, and aluminum and metal in your Recycle Cart/Bin.*
