

REUSE AND DONATE

SUSTAINABLE MOVING

- Reuse cardboard boxes from online purchases and shipments.
- Save money on packing materials by using box alternatives like luggage or containers.
- Reduce single-use plastics and excess packaging like peanuts and bubble wrap by wrapping fragile items in clothing. You also can use pillows and blankets for double-duty packing.

SORT YOUR DISCARDS

PROPER WASTE SEGREGATION

No matter where you are, proper waste segregation plays a vital role in a community's ability to improve diversion efforts and recover recyclable and compostable materials — preventing them from going to landfill. We can no longer afford to ignore the importance of proper sorting.

When discards are sorted correctly, we reduce the negative impacts that the extraction and processing of virgin materials have on the environment and decrease the emission of harmful greenhouse gases, such as methane, that pollute our atmosphere.

Not sure where your discards belong? Visit [WhatBin.com](https://www.whatbin.com), type the name of an item, and find out how to recycle or dispose of it.
