

# Organic Waste Recycling

## For Businesses/Facilities

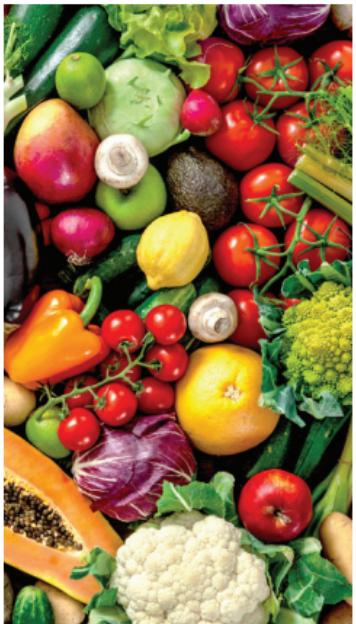

State law requires businesses recycle organic waste such as: green & wood wastes, food scraps, paper and cardboard. Why? These wastes generate harmful greenhouse gases when they decompose in landfills.

In Placer County, if you have garbage collection (mandatory food waste service, or self-haul to one of our facilities), we have recycling handled for you!

Organics are recycled at the WPWMA Materials Recovery Facility (MRF).

If your business self-hauls to the transfer stations or MRF, scan here for a tool to meet State record-keeping requirements. ➔

## We are here to help!

Visit our website or call Recology for assistance.

### Call Recology to:

- ask if your business qualifies for an exemption from food waste collection
- schedule a free site consultation

### Visit Placer County's website to:

- learn about CalRecycle regulations that may apply to your business/facility - *including edible food recovery for many food generators.*
