

# Batteries

---

## Keep Out

Even with One Big Bin – where we sort recyclables for you – some things like batteries and items with embedded batteries like toys, vape pens and cell phones – should never be put in the trash.

Built-in or loose, batteries can cause fires in waste facilities disrupting recycling operations, endangering workers and the environment, and putting garbage collection drivers at risk too.

Don't worry, we've got you covered with free Household Hazardous Waste (HHW) drop-off & pick-up options! See reverse for details.
