**HOW MUCH TO BUY**

Our staff can help estimate how much product you need. Here's a basic guide of yardage needed **to cover 2" deep:**

150 sq. ft. = 1 yd<sup>3</sup>      300 sq. ft. = 2 yds<sup>3</sup>  
450 sq. ft. = 3 yds<sup>3</sup>      1100 sq. ft. = 1 unit

- Step 1 - measure the length and width of each bed (in feet)
- Step 2 - multiply the length x width x depth (convert to feet)
- Step 3 - add the totals together, then divide by 27, this converts the total volume into cubic yards.

***No Refunds or Exchanges!***

## USING COMPOST

Compost improves garden soil, strengthens new lawns, and makes excellent potting mix when blended with other materials. For best results, mix it with native soil—some plants don't thrive in pure compost. Need guidance? Ask our staff!

## CUSTOM BLENDS

Don't see what you want on the list? Ask us about our custom-blending service. For a small mixing fee, we can combine any of our products to make the blend that's right for you!

Our compost has been listed and approved for use in the production of organic products by the Organic Materials Review Institute.

**SUMMER HOURS: March—October**
