

FEED YOUR GREEN CART

Toss coffee grounds, fruit and veggie peels, chicken bones, and soiled napkins into your green organics cart for collection.

It's the law — **SB 1383** requires food scraps and food-soiled paper be diverted from landfills to reduce methane emissions and waste.

Recology collects and then transforms your plate scrapings into compost that feeds the farms that feed us.

Keep it clean. **No plastic** of any kind, no glass, no palm fronds or poison oak, and no pet waste, please.
