

You Toss, We Sort.

*You Toss & We Sort,
so nothing goes to waste!*

At the WPWMA's Materials Recovery Facility (MRF), waste collected throughout western Placer County is carefully sorted to recover recyclable materials and organic waste—including food scraps—for recycling and composting.

Curious what happens to your waste, or have a specific question? Visit PlacerRecycles.com to learn more.

Batteries Do Not Belong in the Trash

Batteries are a big deal! Whether built into a device or loose, batteries can cause fires in our collection vehicles and recycling facilities – putting workers at risk, damaging equipment, and harming the environment. Never put batteries in the trash. Proper disposal is easy! Place them in a clear bag and call your hauler to arrange for a separate pick-up.
